

SCAN COIN 8100

Value Counter

The SC 8100 value counter can count up to five different currencies.

No matter if you are a retailer, work in a bank, exchange office or with elections, you need a note counter that you can trust to do its job to count genuine notes and detect counterfeits week after week, year after year. For you we introduce the SC 8100, a high quality value counter that will deliver outstanding results at a low cost.

Unique design features

When designing this machine our customers' feed-back led the way. This is why there is a built-in carrying handle for example, to conveniently move it around your office. Should there be a jam or problem with the note feeding mechanism, you have easy access to the complete note path and sensor area to remove jammed notes (or to clean) - without having to loosen one single screw!

Sensors and counterfeit detection

The SC 8100 is equipped with the latest sensor technology, including MG, UV, IR and image detection, to securely find known counterfeits. By keeping the machine up-to-date you will always be sure to detect even the newest counterfeits.

Saving transaction data

With the PC Suite software and USB cable that come free of charge with the machine, the transaction data can be saved to a file or database on a PC. Perfect if you wish to process the data further in your ERP system or Excel document.

Multi currency

Up to five different currencies can be installed simultaneously on your machine. There is presently support for more than 40 currencies and new are added continuously.

ACCESSORIES	
EXTERNAL DISPLAY	
PRINTER	Sourced by customer
OPTIONS	
MULTI CURRENCY	Up to five currencies

Built-in handle for easy transportation.

3 preset counting speeds.

Easy-to-understand user interface.

Easy access to the note path to clear possible jams.

Note feeding is easily adjusted.

Value counting and document verification

Besides regular value counting of currencies, you can also use this machine for document counting. This feature is widely used in elections where a lot of time can be saved when skipping manual processes. Not to mention the improved accuracy!

Easy updates and upgrades

Updates are easily carried out by simply inserting an SD card in the SD card slot on the back of the machine. This means that you no longer have to wait for a technician - you simply wait for the card to arrive in the mail! The same update can also be sent by mail before copied onto an SD card. Machine upgrades, such as adding another language or currency, is done through the USB connection and a PC software by a technician.

TECHNICAL SPECIFICATIONS

WIDTH	285 mm
DEPTH	270 mm
HEIGHT	280 mm
WEIGHT	approx. 7.2 kg / 22 lb
VOLTAGE	100-240 V / 60/50 Hz
