- ☑ Transportation, warehousing and more...

Card counting the easy way

- ▪ Low power consumption
- ▪ Lightweight, shock and water resistant
- ▪ Single and accumulation counting modes
- ▪ Supports embossed and flat thermal transfer plastic
- ▪ Easily record data with Emperor management software
- ▪ Ergonomic design fits comfortably in your left and right hands
- ▪

Our most popular card counter is completely portable

Advanced digital scan technology,

EMP1100C handheld card counter is the upgrade to the JC1100B portable card counter. This NEW GENERATION portable card counter—provides brand new functions such as data management, operation menu, and wireless battery charging. Its features advanced low power consumption digital circuitry with photoelectric technology and can count most cards thicker than 0.4 mm, made of various materials and substrates. The ergonomic and compact design packs power and reliability. The EMP1100C will find its place in all QC and Shipping departments of Card manufacturing and Card processing environments.

WATCH HOW IT WORKS

EMP-1100C – Successor to the most popular photoelectric handheld Card Counter in the world
The last decade saw the JC-1100B become the most popular photoelectric handheld card counter globally. Now 5+ years of next-generation development brings you the improved, feature-rich successor to the JC-1100B— **the EMP-1100C**.

Benefits	
	▪ Ergonomic and compact redesign packing power and reliability.
	▪ Data collection & data management with PC interface
	▪ Extended LCD operation menu enabling additional counting options
	▪ Wireless battery charging on stylish cradle
	▪ Reduced power consumption through advanced digital circuitry
	▪ Counting versatility – Most card substrates from 0.4 mm thick (15 mil)Cost-effective & durable performance

Technical Features		
	▪ **Count Modes:** Single Count and Accumulation. Integrates counting modes menu for different types of cards	▪ **Power Save**: Auto power off if no operation within 30 seconds; power on by pressing any key
	▪ **Data record and upload:** Counting data can be recorded and centralized with free Emperor Data Management Software, counting data can be easily uploaded to any PC.	▪ **Power Supply:** Battery Li-ion 3.6V/1600mAh. Compatible with NOKIA 6100 (BL-4C) battery. **Power Consumption:** Standby Status: < 7mA; Working Status; < 60mA
	▪ **Ergonomic Keys:** Two scan keys, two accumulation keys Intelligent keys on the left and right side, compatible for left and right handed users	▪ **Universal Li-battery**. Battery charging method: Plug, USB or wireless charging
	▪ Visual display and audio signal ensure counting accuracy	▪ **Working Environment**: Temperature: 10 ~40℃. Humidity: 30%~90%
	▪ Dimension: 175(L) 70(W) 36(H) mm Weight: 200g (0.55lbs)	▪ **Counting quantity per single swipe:** 1 to 2000 cards. Maximum Accumulation: 99,999
