## Ntegra™ Compact Multi-currency desktop banknote counter

Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

## Ntegra Compact; superior authentication and valuing in a compact device

Ntegra Compact is a small and portable banknote counting solution for your teller, when space is a primary consideration. Designed to fit the footprint of a traditional single pocket banknote counter, Ntegra Compact is a space-saving, light and ergonomic solution for today's busy teller.

Whether it is in a front office application of a bank branch, or a cramped back office environment of a fast food restaurant or retailer, Ntegra Compact is the new standard for banknote counting.

The Ntegra Compact offers numerous development enhancements over traditional single pocket counters, which all combine to ensure the Ntegra range offers additional operational improvements for the user:

- Comparable footprint and size to single pocket banknote counters
- High-resolution full-width detection system ensures improved image detection and fewer false rejects
- A range of connectivity options allow greater operational flexibility, and more data storage options
- An intuitive graphical user interface that displays key operational data
- Clearance Program (Multi Batch Recording)
- Dual-user operation for greater flexibility (available from 2015)

### A multitude of applications

The Ntegra Compact's design allows it to be used in a multitude of locations. From on a teller counter, fast-food outlets and retail and leisure back-office processing environments; wherever space is at a premium, the Ntegra Compact is the ideal note authentication solution.

### User experience

Ntegra Compact provides an unrivalled user experience. A large colour LCD graphical user interface and multi-language options provide a machine which is incredibly easy and intuitive to use. The Ntegra Compact is also easily transported, so is ideal for mobile or temporary applications.

### Connectivity

Today, counting money is no longer just about counting money. It is now about audit trails, data records and statistical analysis. All records need to be kept electronically as well as in hard copy. Collecting and managing this data can be time-consuming, however, Ntegra Compact is equipped with multiple options for automating the process.

### Flexible modes of operation

With an increasing number and complexity of counterfeit notes that must be detected, to meet Central Bank regulations, the Ntegra Compact offers a wide range of operational modes; counting, authentication, denomination sorting, mixed bundle valuing, multi-currency processing, facing and orientation of banknotes, issue splitting and serial number printing.
